

## DATA SHEET

# Sage Line 50

The Sage Line 50 software range is a complete integrated solution, ideal for small to medium sized businesses that are experiencing rapid growth. It speeds up procedures through simplifying complex accounting tasks and automating repetitive routines. With a range of accounting solutions to choose from – Accountant, Accountant Plus and Financial Controller – Sage Line 50 will make a dramatic difference to your business.

Sage Line 50 is easy to set up and use and is based on familiar procedures from manual accounting. There are plenty of on-screen prompts included to help you create, store, access and update all your financial information even when trading in multiple currencies. It can be fully integrated with other business software such as Word and Excel for example, and is available in both single and multi-user variations with network capabilities. Sage are conscious that access and security are key to your business and have designed all products with this in mind.

# Sage Line 50

## KEY FEATURES AND BENEFITS

### **Sales Ledger**

Maintain accurate customer records.

### **Purchase Ledger**

Keep track of your supplier record.

### **General Ledger**

Combine data from all of your ledgers to give you an accurate balance of your accounts.

### **Bank Ledger/Cash Book**

Manage all of your bank receipts and payments, including direct debits and standing orders.

### **Stock Management**

Keep track of what you sell, whether it is a product or a service.

### **Sales Order Processing**

Know exactly which items your customers are ordering.

### **Purchase Order Processing**

Stay aware of all the orders that you generate.

### **Invoicing**

Automate the invoicing Process to save time and improve the accuracy of your record.

### **Financial**

Automatically create your management accounts and GST Return and carry out budget analysis.

### **Product Records**

The Product List gives a comprehensive listing of all the products that you sell at the touch of a button.

### **Bill of Materials**

Bill of Materials allows you to create finished products that consist of several different components.

### **Basic Stock Control**

Basic Stock Control allows you to run stock takes and keep a detailed

track of all movement and pricing of your stock.

### **Advanced Stock Control**

Advanced Stock Control feature will allow you to generate specific orders to replenish the required components, allowing you to have confidence in your agreed delivery dates.

### **Pricing and Discounting**

You can set up individual customer discounts and discount by invoice value or quantity and multiple price lists.

### **Fixed Assets**

Keep track of the value and depreciation of all your fixed assets.

### **Task Manager**

Reminds you of actions you need to take and bills you need to pay.

### **Passwords and Security Access**

Set passwords and restrict which areas of the program individual users have access to.

### **Multi-company Capability**

Run subsidiary company records independently and merge them into a parent company report.

### **Multi-user Capability**

Allow a number of people to work on your accounts at the same time.

### **Reporting**

A wide range of automatically produced and customisable reports are available, including profit and loss, balance sheet and budget reports.

### **Historical Data Analysis**

Archive all your company information at the end of the financial year and build up a complete history of your financial performance.

### **Instant Management Information**

Find your fastest moving products, view your profit and loss, and drill down to whatever you need.

### **Cheque Printing**

Save time and prevent mistakes by automatically producing your cheques.

### **Error Corrections**

If you have posted a transaction incorrectly, then simply resurrect the situation using the Journals Reversals feature.

### **Invoice Templates**

Don't waste time re-keying information - set up a 'template' batch invoice, simply change the values and save.

### **Foreign Trader Module**

Create quotations, invoices and orders in foreign currencies, handle foreign currency bank accounts, and deal with exchange rate fluctuation.

### **Electronic Commerce**

Send and receive quotations, orders and invoices over the internet.

### **Microsoft Office Integration**

Sage Line 50 links with Microsoft Word, Microsoft Excel and Microsoft Outlook.

### **GST**

As all the GST information is stored within your accounting system GST returns can be realistically completed in hours rather than days.

### **Report Designer**

The advanced report designer gives you the ability to produce your own reports quickly and easily to meet this type of situation.
